

SUNBOX

Portable Off- Grid Solar System

Sunbox is a powerful and compact Off-Grid solar energy system that provides power to remote areas where access to electricity is limited. Sunbox is a smart choice for all basic electricity needs and is an ideal substitute for fuel generators

Sunbox Applications

Sunbox	
PV Panel	100WP
Rainy days	2Days
Battery life	2-3 hours a day
Appliances	

Schematic Diagram of the Off-Grid System

System specifications

- Solar panel: 100W
- Solar controller: 20A
- 12/24V DC to 110/230V AC Modified Sine Wave Output
- Charge from PV panel or grid
- Continuous Power up to 2000 Watts
- Overload protection
- Auto transfer time: <8ms
- Dual AC Outlets for running multiple electrical appliances
- Installed with maintenance free sealed lead acid battery: 100Ah
- LCD display: AC output watts / DC voltage
- DC jumper (Anderson Jack)

2000W Power
